REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The Applicants' claims have been allowed because independent claim 1 is limited to accumulating ammonia in an accumulator in a *gaseous* state. This feature is not taught or suggested in the primary reference applied in the 103 rejection (i. e. U. S. Pat. 6,361,754 B1 to Peter-Hoblyn et al.), and this feature is also not taught or suggested in the secondary reference applied in the 103 rejection (i. e. US 2004/0146441 A1) which only teaches the collection of *liquid* ammonia by using water as the storage medium (please see paragraph no. 0049 in US 2004/0146441 A1). Further, the Applicant has limited his independent claim 1 to recite that the pressure at which the gaseous ammonia is accumulated is between the pressure at which said hydrolysis reaction takes place and the pressure at which it is introduced into the combustion flue gas - and this limitation is not taught or suggested in either U. S. Pat. 6,361,754 B1 or US 2004/0146441 A1.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.".
